

AVOID THAT WHEELS AND RIMS SLIDE OFF THE WHEEL TROLLEY DURING TRANSPORT

Wheel Trolley Anti-slip 600 are round rubber mats that can be placed between complete wheels or rims that are stacked.

When a rim is higher than the tire, you will often see that the stacked wheels very easy can slide off. When transporting wheels or rims on a Wheel Trolley this can cause that the load falls of the trolley.

When using Wheel Trolley Anti-slip 600 you secure the costly load from sliding off.

Wheel Trolley Anti-slip 600 is made of recycled rubber granules and has a width of 600 mm – and fits thereby perfectly to all Wheel Trolleys by AHCON.

**MADE OF
RECYCLED RUBBER
GRANULES**

FEATURES

- Avoid that wheels and rims slide off the Wheel Trolley
