

WHEEL TROLLEY TOWER LIFT 2.0 / 2.1

USER-FRIENDLY HANDLING OF WHEELS IN TALL TYRE RACKS

TYRE STORAGE USING THE WHEEL TROLLEY TOWER LIFT

Wheel Trolley Tower Lift is a compact and space-saving truck for the ergonomically correct handling of wheels in extra-tall tyre racks – at heights of up to 6 metres. Tower Lift has a customised tool at its front which is compatible with our popular Wheel Trolley.

The actual handling into and out of the tyre racks is carried out by the use of Wheel Trolleys. The job of retrieving and inserting wheels from and into tyre racks can take place at an efficient pace while allowance is still made for ergonomic considerations.

Wheel Trolley Tower Lift is available in two models which lift up to 5.3 and 6.0 metres, respectively.

FEATURES

- Entry and exit on both sides
- Hydraulic function of front tilting tool
- Equipped with reverse camera and information display
- Three set speeds
- Wheels are handled directly on Wheel Trolleys
- Reduces the needed width for walkways between racks to 1.4 metres
- Efficient and ergonomic handling of wheels
